WINDOW 2

The screenshot shows a terminal window with two tabs open, both titled "Ubuntu-20.04". The left tab contains a series of alias definitions:

```
alias dst='docker start'
alias dsp='docker stop'
alias dr='docker restart'
alias dl='docker logs --follow'
alias di='docker inspect'
```

The right tab shows a command-line session:

```
c/Users/Luca Küchler
> ping
ping: usage error: Destination address required

c/Users/Luca Küchler
> sleep 10
```

A vertical yellow bar highlights the right tab's content. The bottom of the window displays a status bar with the numbers "1,7" and "All".
